Professional Summary

Frontend Engineer with 5+ years of experience designing and delivering scalable, high-performance web applications across enterprise, fintech, and AI-driven platforms. Expertise in Angular, React, TypeScript, RxJS, and modern frontend architecture, with a strong focus on component-driven development, state management, performance optimization, and responsive user experiences. Experienced in building AI-powered applications leveraging Generative AI, RAG workflows, and LLM integrations, while ensuring code quality through automated testing, CI/CD pipelines, and modern DevOps practices. Proven track record of collaborating within cross-functional Agile teams to deliver secure, maintainable, and user-centric solutions that drive business value.

Skills & Technologies

- **Languages & Frameworks:** Angular (v2–v21), React, TypeScript, JavaScript (ES6+), HTML5, Node.js (NestJS), SAPUI5, Chart.js, D3.js
- **Frontend Engineering:** Component-Based Architecture, Domain-Driven Design (DDD), Responsive Design, Angular Signals, RxJS, Micro-Frontend Architecture, Design Systems, Accessibility (WCAG 2.2), Data Visualization, GenAI Applications, RAG Integrations, MCP Servers, REST API Integration
- **State Management:** NgRx Signal Store, NgRx, NGXS, Redux Toolkit, RxJS
- **UI/UX & Styling:** Tailwind CSS, Angular Material, PrimeNG, Bootstrap, Radix UI, Styled Components, CSS3, Figma
- **Testing & Quality Assurance:** Jest, Vitest, Cypress, Playwright, Unit Testing, Integration Testing, End-to-End (E2E) Testing, Test Automation
- **Security & Authentication:** OAuth 2.0, RBAC (Role-Based Access Control), OTP Flows, Secure Input Handling, Form Validation, ngx-mask
- **Tools & DevOps:** Git, GitHub, GitHub Actions, Bitbucket, Azure DevOps, Docker, Kubernetes, ArgoCD, Jenkins, npm, Jira, CI/CD Pipelines
- **AI-Assisted Development:** GitHub Copilot, Claude, Prompt Engineering, AI Workflow Automation

Professional Experience

SAP, Germany | Remote
Frontend Engineer (Contract) | Oct 2025 – Present

- Developed data-intensive Angular dashboards for business reporting, improving decision-making efficiency by 40%; built and optimized interactive visual components for large datasets across enterprise applications.
- Led frontend development of an AI-powered React workflow platform, enabling support teams to design and execute customizable workflows across Service, Data, and LLM contexts by integrating RAG and Generative AI to deliver intelligent, context-aware incident resolution workflows.
- Architected scalable state management using Redux Toolkit with async thunks and implemented optimized workflow change detection mechanisms to efficiently track unsaved structural and property updates across complex workflow configurations.
- Optimized platform performance through React.memo, virtualized list rendering, custom hooks, and reusable component architecture, ensuring responsive user experiences for large workflow datasets.
- Established quality standards with Vitest unit/integration testing and Playwright end-to-end test automation, improving application reliability and reducing production defects.
- Designed CI/CD pipelines with Docker, Kubernetes, and ArgoCD (80% deployment efficiency gain); achieved 97% automated test coverage, significantly reducing production defects.
- Led migration of Mend security scans from Jenkins to GitHub Actions and leveraged AI coding agents (GitHub Copilot, Claude) to accelerate development velocity and improve code quality.

Guaranty Trust Bank (GTBank), Nigeria | Hybrid
Frontend Engineer | Jul 2022 – Sept 2025

- Delivered a high-impact Account Opening Module for Non-Resident Nigerians (NRN) using Angular and Tailwind CSS, streamlining digital onboarding and increasing customer acquisition by 5%.
- Developed a secure API Management Portal for third-party onboarding, implementing OAuth2 authentication, OTP verification, RBAC, session tracking, and IP-based access restrictions, strengthening API security and reducing unauthorized access risk by 60%.

- Led the migrating of the Internet Banking platform from Angular 8 to Angular 19, modernizing the frontend architecture, eliminating technical debt, and improving application performance by 25%.
- Developed the GT Funds Manager web platform, enabling seamless onboarding for both GTBank and Non GTBank customers into our Fund Management Application, increasing customer acquisition by 12%.
- Optimized UI responsiveness and authentication workflows within the Access Manager SSO platform, improving user experience and increasing system performance by 10%.
- Built interactive investment dashboards in the Fund Management Application using Chart.js, enabling data-driven insights for 10,000+ monthly active users and increasing engagement with investment analytics by 25%.

Junior Frontend Developer | 2021 – 2022

- Contributed to bug fixes and Agile feature delivery in Internet Banking, helping close over 90+ tickets.
- Maintained the Staff Transport Web App (Orange wheels) connecting 5,000+ employees to drivers across multiple branches.

DafeSoftware Ltd, Nigeria

Frontend Developer Intern & UI/UX Designer | May 2020 – Jun 2021

- Built real-time Angular dashboards, reducing manual reporting by 40%.
- Improved UI performance by 30% and raised accessibility scores to 95%+ WCAG compliance.
- Collaborated with cross-functional teams to deliver intuitive UIs, increasing task completion rates by 25%.

Education and Certificate

- **B.Eng., Electrical & Electronic Engineering**
  University of Benin, Nigeria — *2014 – 2018*
- **Academy Accreditation – Generative AI Fundamentals**
  Databricks Dec 2025 – Dec 2026
